(ii) To maintain ecological balance in iragile mountains, such as, Himalayas, Western and Eastern Ghats, Aravalis, etc.

(iii) As water is a critical input to production system, la id and water cycle should be m untuned harmoniously to meet increasing demand for water to have higher produc tivity of land.

(iv) The areas under forest should be preserved at all cost and endeavour should be to extend forest cover "to the desired one-third of total geogiaphical area of the country.

(v) To prevent the diversion of good agiicultural land for non-agricultural purposes especially when less productive land is available.

(vi) Preparation of detailed inventories 01 land, soils, plants, animals and human beings for formu lating integrated plans) of action.

(vii) To intensify soil and water conservation programme including land reclamuion with sufficient outlays.

(viii) To undertake time bound soi1 and land use survey programme.

(ix) To review All Acts relating to 1 md use. There is need for a single comprehensive legislation of land use to improve the present data base.

(x) To increase public awareness in the programmes of land use and management.

(xi) To ensure people's participation and involvement of voluntary organisations to undertake programmes for controlling land degradation and wasteland development.

(xii) To ensure integrated land and water resource management with better crop/plant technology for improvement 01 productivity from rainfed areas.

The National Land Use and Conservation Board in its first meeting held on 17th October, 1985 while appreciating the work of the Committee of Experts in preparing the drait outline of National Land Use Policy decided to set up a Committee under the Chairmanship of Shri B. B. Vohra, Chairman—Advisory Board on Energy, to revise the report and prepare the National Land Use Policy Statement which *inter alia* should take into coasidera-tion the National Water Policy and the revised Forest Conservation Policy which are currently under formulation, the factors having a bearing on land use patterns and productivity, people's participation and also consider the role of science and technology inputs in optimising land use and management. The action plan lor implementation of National Land Use Policy will emeige from the Navional Land Use Policy Statement after it is approved by the National Land Use and Conseivation Board.
